DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities:

The following claim language:

"... alleviating a perception of said degradation between said received data from the first user communication device and said second of said at least two user communication devices by smoothing said communication services using at least one of said user communication devices if differences detected exceed a threshold.", fails to render substantive support to the claimed invention. For example, the word "**given**" is exceedingly broad. Who or what determines the differences? This language must be narrowed in order to disclose the essential elements required to complete the claimed process, i.e. "comparing said differences with a threshold, said threshold values are.....".

In addition, the Examiner suggests a re-draft of the alleviating step. The step should be re-written as a "whereby" clause due to its lack of substance it adds to the claim.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-23 would be allowable if rewritten or amended to overcome the objection(s) set forth in this Office action.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
